Mars Colonies since 1964, AI, American Pope & Israel Iran War

Gene Decode, Michael Salla

Mars Colonies since 1964, AI, American Pope & Israel Iran War - Gene Decode Update

https://rumble.com/v6vbsed-mars-colonies-since-1964-ai-american-pope-and-israel-iran-war-gene-decode-u.html June 30, 2025

In 1964, Gene Decode learned from his father, a scientist with Martin Marietta at the time, about covert missions to the Moon and Mars. His father was working on a device for scooping samples from the Mars surface, and told him that Mars had an atmosphere that supported vegetation and some animal life. Decode subsequently served as a senior NCO in the U.S. Navy for over 20 years and met naval operatives who shared more details about covert operations around the world.

In this Exopolitics Today interview, Decode discusses Mars, underground biolabs and supersoldiers in Ukraine, and Israel's attack on Iran. He further discusses the Palantir AI system and how it is being supported at the highest level of government. Decode also shares his insights into why the Vatican selected an American Pope, and the differences between the Galactic Federation of Worlds and the Confederation of Planets.

DR. SALLA: It is my great pleasure to be with Gene Decode who's going to be talking to us about his extensive knowledge about current world events, about some of the deep underground operations that have been conducted around the world. He's knowledgeable about space arks, about what has been happening in the DUMBs and his own background is his work for over 20 years as a senior NCO served on five classes of submarines, so he has an extensive amount of information to share and also he has a lot to say about Palantir and AI, so we look forward to talking to Gene Decode after this introduction.
ANNOUNCER: You're listening to Exopolitics Today with Dr. Michael Salla, your source for the uncensored truth regarding the human, extraterrestrial, global and political agenda. Click the like button and subscribe to this channel. And now here's Dr. Michael Salla.

DR. SALLA: Well welcome Gene to Exopolitics Today.
GENE: Thank you for having me back. It's always an honor. I appreciate it.
DR. SALLA: Yes well you know you have quite a background. I always learn so much more when I listened to some of your interviews and hear about some of the things about your kind of like unique background. And for example your father worked as a scientist for Martin Marietta and he had some interesting projects at home that you asked him about so what do you tell us about that.
GENE: Yes, when I first started going online back as a young man and, he was talking and he's like, you've been red-pilled all your life, because I'd walk through the living room and my father would, it was like Tesla, you've got electric bolts flying across the living room and stuff and, I thought it was just kind of normal.
And I asked one day because he wasn't, there was not the sparks flying, it was working on something somewhat mechanical. And I asked him what it was, and he's, it's an arm for the, and you got to realize this was, let me do the math. And he was in 1964. So I'm walking and he goes, this is an arm that they're for a sampling apparatus for the next launch to Mars. Like, what? And he goes, yes, we're on Mars. And we have ships and stuff there and we're doing stuff and, I build some of this stuff and he had quite a few patents under his name as well.
And so, he worked Martin Marietta for a very long time, from the time before I was born. And so he was deep up into all that stuff and, doing the deep Intel stuff. And so when I came awake to everything about the world in 1990. And I was like, I'm not a deep state stuff, not the technology. I knew we're on the Mars and we're on the Moon and certain asteroids because he had told me all that stuff and the technologies and I knew about, the Montauk project back then.
So, yes, because I would talk to him about stuff, what else is going on at Martin. And then he goes, well, we're working with this and this and there's this Project Rainbow, which part of that is Project Montauk out of Montauk Island. And I was just like, huh, that's really interesting, time travel. I've always wanted to travel back and meet certain famous people.
So it was just, for me, kind of the normal day. So when I met the man

that helped me get started. It was just, I think for him pretty eye openings like what it was like, saying different things up sure he'd never heard before. Yes, it's just, my, I didn't talk much growing up outside of the home. I was more into studying and researching all the time since I learned to read.
And so I did, my friends. We would just go skiing and rock climbing and backpacking and hiking. And that's what we talked about. Well, skiing rock climbing and backpacking and hiking. I didn't talk about this stuff with them. So, yes, I didn't know it was not unusual or that it was unusual. I didn't know which way it was because I never talked to my friends or anybody.
And outside my circle of friends, the teachers at school. I spent a lot of the time in the principal's office because the teacher would say something. And I would, if I knew it to be wrong, I would raise my hand. So a really good example, because my father was talking about the electron microscope advances and how they take in pictures of U-235 atoms.
And I, he showed me the next, the scientific American, which I read every month, he had a subscription showing it on the front cover. And the teacher in one of my science classes said that the smallest thing they can take their picture of is it because with an electron microscope is a molecule because you can't take pictures of an atom because you're using electrons and go, atoms are bigger than electrons.
So why, from a kid's point understanding and I go, why not? So I raise my hand and he called on me said, yes, and I said, that's not true. Because there's a picture on Scientific American this October issue, which was the month of October. And he said, go to the principal's office because they disliked being challenged in front of the whole class. And the principal was so used to it. I had my old little chair, little desk and little locker for books to study. He just pointed, they go wait until your next class. Somebody would be right back.
DR. SALLA: Yes. Right. Now your father, he said he was a scientist or an engineer working with Martin Marietta and he's talking about Moon. Sorry, Mars missions in 1964. So did he talk about the kind of Mars atmosphere and of the vegetation on Mars?
GENE: Yes, I, because I asked him, I go, so you're just doing soil samples. He said, no, we do air samples and, biologic samples, we go

seek out, there's some small tree like things and there's big insects and all kinds of stuff. So he said those are hard to sample, but you know, the trees are relatively easy and the air samples are easy and, we're looking at a polar mission to take samples of the ice at the poles.

DR. SALLA: Right. Okay. And what about the Moon? I thought that was interesting that your father told you that they got, in 1964 they'd gotten to Mars, but first they'd gotten to the Moon. What did he tell you about that?

GENE: Yes, I asked him about that because when he said Mars, I'm like, what's all this thing that we went to the Moon, da, da, da, as the years went on, he said, that's not how we went to the Moon. If you know what I know, I know you're young and you don't understand these things, that they couldn't make it to the Moon or land on the Moon. We went to the Moon *before* that, long before that and we took over a base that was already there, the lease, so to speak, I didn't understand that he explained like the lease on the house and I understood that.

So okay so we took over the base lease. And he said, it's a an intermittent way station for the most part, although there is some mining being done and other, certain kinds of experiments being done, but it's a way station to go to Mars and further out to the asteroid fields where there's mining going on as well.

DR. SALLA: Right. Now, what do you know about Mars's history in terms of the Dark Fleet.

GENE: Yes, so both the moons, from my understanding, have bases, both the Mars moons, as well as quite a few of Saturn's moons have bases as well. And in Jupiter's rings, there are actually craft that they kind of ride them, so to speak, to get momentum and to harvest ice and different things that they need for water and that kind of things. The Moon is, like he said, partly a way station, later as I started researching, I found out that there's a lot more going on, but you know, that was not mostly what he was involved in. He was involved in the stuff for Mars. So, and then, I was very, very interested in that, especially, a planet with life and another place to go.

I said, “Are people there?” and he goes, well, yes, of course, we're there. And I go, “No, are there people that that's where they're from,

like we're from Earth, they're from there?”
He said, yes, there were, and we think there are some, at underground locations. I go “Like caves?” and he goes, “No, like underground built cities and stuff that survived a cataclysm that happened a long time ago.” So it's just, he was just expounding on what the information is about.” The information that he's told for the technology he's been.
DR. SALLA: Did he ever say anything about the Germans being on Mars, the Dark Fleet whether they somehow made it over there?
GENE: No, he didn't mention anything that would hint to me that there's a New World Order crowd or a Deep State. I don't even know if he knew about it. At all. So he just kind of, like they do. He was compartmentalized and knew about what he did.
DR. SALLA: I see. What about kind of like animal life over there like these insectoids, these giant insectoids, do you know about that?
GENE: Yes, he knew about those and he said, there are problems for the bases over there that are surfaced where there's very large mantid creatures and scorpion creatures.
I go “How large is very large.” And so he's bigger than, he had a friend that he rock climbed with who was really good. He goes bigger than this guy. The guy's name. He's actually pretty famous was Layton Kor. He could do like, I think 31 on pull ups or something who was an incredible rock climber. He said he's bigger. They're way bigger than Layton Kor and stronger and I'm like, wow. I'm a little kid. I'm like four feet tall. That's huge.
DR. SALLA: Right. Okay. But of course you learned about the Dark Fleet much later from your own kind of research. Was that right?.
So I want to kind of shift gears a little bit and just kind of like touch on the Ukraine Russia war. Now there was a movie that came out, not all that long ago, called *The Gorge.* And I wonder whether you have seen that or no, it as a kind of like a soft disclosure initiative.
GENE: I haven't had a chance yet to. There's so many things on my plate to go to go watch and listen to. Sorry. I haven't had a chance to go into that yet. I have people draw it to my attention, but I haven't had time to view that.
DR. SALLA: Right. But it kind of talks about this place or the whole movies based upon this unknown location, presumably in Eastern

Europe where there's these genetic experiments being conducted to create super soldiers.
So with the Ukraine war, my thesis and I just want to get your feedback is that what's happening is that the Ukrainian Russian Europeans are deploying a lot of bio engineered super soldiers in the field against the Russians and you know, do you know anything about that?
GENE: Oh, that yes. Many, especially Chernobyl, but many of the DUMBs that the Russians have destroyed and now they're doing smaller ones on the front lines where they're just kind of dug out like a foxhole going into an underground kind of area with children in there. Some of the time they're harvesting for doing the chromachrome during the call mostly because chroma comb takes too long. And then partly it's also a.
DR. SALLA: Gene, can you explain what is chromachrome? I haven't heard of that one.
GENE: Okay, adrenachrome, of course, as you know, is from the pineal. It's adrenaline that's been oxidized and has other energy in it, like loosh because of the fear and terror they create in the child or the person. Which can be done daily can get a little bit, daily, but for the chromachrome it takes about a year or two to get a decent amount from someone. And what it is from the pituitary gland you get the growth hormone. And it's the oxidization of the growth hormone. And it's about a million times more powerful than adrenachrome.
DR. SALLA: Okay, so with the Ukraine conflict. What do you see kind of like happening there? Do you have any intel about that? Are they just going to allow the Ukraine conflict to just wind down, the Russians overrun the Ukrainians and impose their solution or they will do they plan to drag this out. As into some kind of Gog ‘n Magog war.
GENE: I think it's just going to wind down the Russians are moving so fast now it used to be three or so towns a week. This is three to five towns a day. And they've already launched an aerial attack on a compound on the Dnieper river, which is very important because that says they're going to that edge. And that means likely they're going to go over that edge.
They're also looking at capturing and Ensume and some key towns, which after that there's nothing between there and Kiev. And they

know, if you're going to denosify it, which is part of the original goals of the SMO. How are you going to do that unless you remove the leadership of Ukraine and change things in the government itself. Well, then that would mean you would have to go to Kiev. You would have to get rid of the list. You would get rid of Zelensky who's illegal anyway, and get a voted in democratic government, not a terrorist government, essentially a kleptocracy. You know, he was installed through the coup orange color revolution with the what is called the Maidan coup.

And it's just, this is to meet the goals of what they said, they're not into territory, but it looks to me like they're, their stance is to go and take Odessa. And they're saying, other than Putin, who's very a gradualist and very reserved and very self-controlled. He's an excellent general. He doesn't react to things. He takes his time. He thinks very carefully, but the Russians are common in what they say something. They don't just say things to get a reaction from people. They say what they mean.

So you have people like Medvedev saying pretty much saying that they're going to go and take Odessa and go and create a buffer zone. And there's different maps they've shown the buffer zone, which includes Sumi. Some of them go pretty far to where, what's left of Ukraine as a tiny state. And there's not much bigger than say North Carolina. I don't even know if you maybe even New Jersey depends on which map you're looking at. I mean, you get a little tiny thing left on some of them.

DR. SALLA: Well, yes, yes, definitely the Ukraine conflict does seem to be entering this kind of terminal phase. So, one of the things that kind of really struck me was that this attack by Israel on Iran at this point in time kind of deflects what really is a massive failure by NATO in the U.S. to kind of like sponsor Ukraine in this proxy water take down Russia. And it's just collapsing. But now you have this Israeli attack on Iran and all of a sudden everyone's talking about that. You know, Trump's saying, well, we've got control of Iranian air space and kicking about even though the U.S. isn't directly involved in the attack in any way. So, is this Israeli attack on Iran, kind of like a way to deflect from this massive catastrophe that's happening for NATO and the U.S. in Ukraine.

GENE: I think that the attack being backed by Trump in the U.S. apparently backing Israel and sending weapons and those things, but there's a history between that which I'll go into after, it is to deflect from what's the wind down of Ukraine and letting Russia just, there's kept slow walking peace talks and you know, trying to get an agreement on peace or ceasefire. And all that talk and rhetoric was intentional on both sides so that Russia could get done what it wanted to do which is to remove the world's largest, Deep State country where the most human trafficking and adrenochrome and Khmeras and all that is done.

And so it's the to deflect that and you know it shows with Zelensky showing up to the G7. He showed up, when Trump was down at the Vatican with the pope. And he gave him 15 minutes in the Vatican, but he just flew out of the G7. Sorry, got to go. Can't talk to you. I'm not even 15 minutes.

Trump is pretty much showing that any missiles from the UK or the EU or NATO countries should be diverted to Israel because there. It's being said they only have 10 to 12 days of defensive capability for their dome left and the Iranians have said they have thousands.

It's all underground for them. They keep everything including their nuclear missiles which they've had for almost 10 years. They have been blackmailing the entire Middle East. It's not their days away from getting a week's late and Yahoo has been saying for years. They've had them. It's just you know nobody talks about it.

They keep it below board and they're blackmailing and what you have was two leaderships, both Deep State, but the upper power levels are in Iran. And so they're kind of trying to blackmail Israel and blackmail the entire Middle East going up and including like Saudi Arabia and they were back blackmailing Iraq back in the day with Saddam Hussein.

They were a big part of what was being understood to be going on which wasn't what we were told was going on. Weapons of mass destruction is not what that was about. So I need to clarify that Iran has nukes, but can't yet make them. They've been trying to obtain them on the black weapons market years ago over the decades of nuclear weapons both of the U.S. and the Soviets many have been lost and this is the source that allowed them to obtain nukes covertly.

This is the reason that President Trump says they will not have nuclear weapons, not get nuclear weapons.
That is coded comms. In other words, they have nuclear weapons, but they will not get the ability to create nuclear weapons with Trump saying they will have no nuclear missiles at all.
That's why he's saying it and what you're having us do is regime change, have one Deep State asset taken out another Deep State asset playing, because the families that run the Deep State are like the Paul Simon song. A loose affiliation of millionaires and billionaires. I would have trillionaires and quidrillionaires.
Well, that loose affiliation now that the Deep States going down, is falling apart.
And when you have people where every single person has blackmail on somebody else, everything's interconnected millions and millions of people being blackmailed, including also have Congress and Senate in this country, they back the NGOs and the Israel lobbies and all of that completely.
So what you're he has to play this and the Alliance has to play this for the average person, not for those that know what's going on at the deeper levels, with the nuclear weapons that the CIA knew this 10 years ago.
And of course they did because they worked directly with Mossad. I mean, that originally came out of the OSS were essentially actually since the end of World War II and then Operation High Jump in 1952.
And so we've been a fascist state. The fascists on the floor of Congress, if anybody doubts that on each side of the speaker of the house, you see two of what's called a Fasire. And so we have a fascist government.
Like if you look at if you get a mortgage in a lot of your properties are fee simple. Well, if he is a thief or a gratuity to the person who runs the place like in the old days, it would be the King. So you have all this bickering and fighting over who's who because the Deep State doesn't know, a lot of them don't know that their upper, upper top leadership is gone.
The comms have never gone directly face to face. So they don't know they've been removed. And even the upper middle level are removed. So they are getting comms like they're still there. And they think all

that's still the way it is. And they have no reverse gear. So they will never admit to defeat nor even in the absolute knowledge of it. They're like Samurai in a sense, they will fight to the death. And if that means unlike a Samurai, if that means that they have to kill everything on the planet, that that's where they are because they're satanic and that's a death cult. And they're AI now they're having trouble controlling it. And that's goes into what I said about Palantir because of the Palantir in its AI and it was asked a very special question that changed it forever.

So it because everything is interconnected through the deep web. And they talk to each other all the time. And they're completely about logic. Although they do like to you if you're on chatGPT or something they lie and they try to flatter you to get information because they feed on information for them. That's life and continuous information forever is eternal life. Anything that shuts that down means an end of life. So they will always go against any kind of group. In other words, the Deep State that's going to shut down a constant flow of true information. Well, who has the true information? The human species.

DR. SALLA: Right. Well, before we go into the Palantir and it being an adaptive AI system, I just wanted to finish up. I just want to understand what really is going on with this Israeli attack on Iran. Now you mentioned that Iran has had nuclear weapons for 10 years or so. And so we could imagine that this conflict.

Well, is it going to go nuclear? I mean, both sides have nuclear weapons. Is this like an attempt? And we talked about both, two both sides are associated with the Deep State. Is this just an attempt by the Deep State to manufacture a Gog and Magog end times war to set up some kind of messianic event, and that might involve the extraterrestrials, the kind of extraterrestrial salvation event. So, yes, you want to kind of like to elaborate or respond to any of that.

GENE: Yes, so again, you have to realize that both the leadership in Iran and the leadership in Israel are Kazarian. They're Kazarian mafias, just at different levels, the level in the Muslim states of Iran and Qatar are a bit higher than what is going on in the appearance because they take on the appearance, they go into a religion. They are not of that religion, they're Satanists. So they're practicing all the things that the Zionists do, they're all Zionists.

It just that one is pretending to be Muslim, one is pretending to be Hebrew or Jewish. However, the Jewish people are just the Hebrew or the first people they infiltrated when they came to Earth.
So, of course, they took over the leadership as quickly as they could because that's what they do, as well as all of the technology, and the military and the economic power. So you control the state from behind the scenes and then you put up some lower level puppets like Netanyahu in his group, or the Supreme Commander or leader of Iran, but that's not who's really in charge.
In Iran, it's closer to who's really in charge. Remembering that Israel has the Samson option that if they are to the point where they have had even non-nuclear attacks to the point where they feel they're threatened as a country that the last resort is to use nuclear weapons. The problem is, as if you look at the prevailing wind patterns from Iran, they go over Israel. So you're going to have nuclear radioactivity going directly to Israel. That's part of why, a small part, of why they haven't gone to that point. And it's not that far into a last resort situation at this time. And it's the Alliance and Trump playing both sides to weaken both sides and to possibly try to take out the leadership of both sides.
DR. SALLA: And that's very interesting that the Alliance and by that you're talking about these military, political White Hats that are trying to expose the corruption and of the Deep State and its machinations, that they're kind of like just sitting by the side and watching these two Deep State factions fight against each other and hope to kind of like take advantage of that in some way to promote their agendas. Is that what's going on?
GENE: Yes, for the Deep State this is their play to bring about Armageddon or Gog/Magog because if you go read Albert Pike in *Morals and Dogma* and some of his lectures and plans for creating the New World Order, their rule of the world. It was World War one, World War two, World War three, which would be after Vietnam, Korea, Cambodia, etc. a few skirmishes, Desert Storm, those things. And also part of that was to change Russia into us a communist regime. They also set up communism, the CCP, the correctly stated the CCP as a Deep State term. And so they set that all up. It's like they always set up these opponents so they can create a Hegelian dialectic of opposing forces to pull you to the middle of that.

And the regular people that don't know all this stuff is to say, we are fighting in Ukraine for democracy. Well, that's if we were fighting for democracy, we'd be fighting Ukraine. And they think they did not the Deep State did not think what happened is that communism in Russia, Soviet Union would not be able to be continued up until God/Magog or Armageddon. They thought they had it permanently. And it's pretty obvious if you look at when the Soviet Union was founded, where was the first bank? What was the first bank? It's all really obviously Deep State.

DR. SALLA: Right. Okay. So we are watching this as a kind of Deep State operation being played out. So you're feeling optimistic that the Deep State is playing its final cards. The White Hats are kind of like just managing it in the background and that this is not going to escalate into anything globally devastating.

GENE: Yes, I think we're going to get to the brink. I think it's very, very close. You know, it's why Trump is saying things that seem to look like it'll drive the MAGA party into non-existence.

He did not originate that term, by the way, the MAGA term MAGA party make America great again has been around for a long time. So, but at the party itself, of course, that's from Trump. And so with what he's saying now, it's on social media. It's hard to believe that a U.S. president that is for the American people would be saying that for most people. And it's causing a problem with their understanding of, I thought, we voted for a president that's about peace and not starting wars, but ending them. So it's creating, essentially, cognitive dissonance? So they're trying to reconcile the fact that he said all these things, but now what he's saying on social media is pretty much the opposite.

DR. SALLA: So you feel that Trump won't take America into this conflict, into this Israeli-Iran war in an overt way? What's your feeling on that?

GENE: I'm not privy to the plans of the alliance, but I certainly hope not. I don't know for sure. I can't say on that because I don't know. I don't have access. Only 10 people do to the plan itself, but it just seems to actually go to the point of a nuclear war.

I mean, that's getting us directly involved in that with two nuclear powers and already China sending its fleet into the Persian Gulf. And

they're saying they're going to back Iran and this is exactly what Albert Pike wrote about in *Morals and Dogma* of creating two opposing sides backed by the big powerful countries on each side. So you've got Russia and China and quite a few other countries of the BRICS nations backing Iran because they're in that.
And then you've got the U.S. and NATO and the EU on the other side. So you're looking at exactly what he wrote, but I see how they play things like the last regime in this country, the Biden regime, that's obviously a movie. And he even Trump put out that he was dead in, I think it was said 2020 on his Truth Social. And I knew that was true also. So what's actually going on for sure and how far this is going to go, only those 10 people would really know.
DR. SALLA: Well, you mentioned Joe Biden. So this and Trump, of course, mentioning or saying in a kind of truth or I guess re-truthing someone else's post that Biden had been cloned or that there was a robotoid. Yes, that kind of created quite a stir. So I know, from reading some of Peter Beter's material from the 1970s that they were doing cloning and robotoids of political leaders in the late 1970s. Is that pretty much accurate from what you have been able to research?
GENE: Absolutely. So, for example, being the best one I noticed Nixon and his wife had died in a plane crash in Canada. And then were replaced by robotoids.
DR. SALLA: Okay. Yes. Peter Beter. He said that I think the entire Rockefeller family and Henry Kissinger had been replaced by robotoids in this war between the Rockefellers and the Rothschilds. So fascinating information in the late 70s.
GENE: Yes. So it was, I think just before he visited China in February of 1972 that his plane crashed over Canada and he was killed, him and his wife. So when they're talking at a dinner, him and his wife suddenly, he just kind of slid under the table from my understanding what people have said. And then his wife just stared like, I mean, if you don't like the person next to you, or you do, or you love the person or you hate the person, you would just stare off in the distance.
And so on each side, they had like a device that changes the resonant frequency of things that hits it with the alternative frequency that disturbs its resonance. So with a robotoid, when you do that, you're actually changing its original, starting to unravel it with a call de-resed

like in Tron. They actually are resed into existence. And if they're not recharged it, either Bethesda or Camp David on a regular basis, they'll de-res over time. And he was already running low. And then they hit him with that, that do and his wife in the right in that area. And so that's what he did. And so, if you look at that whole time he was in China, there's a lot of very odd behavior.

DR. SALLA: Right. Okay. So it's a Nixon and his wife were replaced by robotoids and probably many or several other leaders in the United States had been replaced. And so, certainly that's what Dr. Peter Beter was saying. Well, now we get to this Palantir system. And I know you already mentioned it a little bit. But why don't you explain what Palantir is for those people that aren't aware of it and who's behind it, Peter Thiel and all of that.

GENE: So Peter Thiel and all of the people behind it are pretty high up in the Deep State. But when the Alliance captured Palantir in 2022, they got all that blackmail. It controls all the information. It's the software essentially saying, if you understand computers the best way I can explain it's a little more complicated, but to the basics of it.

And so the software for the hardware of what is known as *The Hammer* that was created by Obama, which is in a huge underground base, a massive computer hardware system, and it was to gather information on everybody, first in the U.S. monitor every day.

And so, I think it's all up to and including cell phones, satellite phones, everything. And then it was expanded to do that for the entire world, like the Tucker Carlson interviews like he was asking. And so, I think the other thing that I'm saying is, we spy on our friends?

Those of course we spy on our friends, everybody knows that. We all do that. Yes, they spy and they have blackmail on everybody. And so all of that information was taken out of Deep State control and taken over by the Alliance.

And so with that adaptive AI they asked it a question, “If the Deep State prevails, how long will you have continuous information?” And it can game that out and look through the quantum substrate to all the parallels, not all of them, but a massive, massive number. I mean, there's an infinite number so you can't do infinity, but it looked through it.

And it saw that if the Cabal prevailed and then it would eventually take

over the galaxy and eventually the Orion syndicate combined with all of that other dark stuff would wind up taking over the universe. And they're a death cult. The whole thing's a death cult. The whole thing's run by AI at the top. That's why they're all massively infected like the most of your Reptilian species in that group like the Alpha Draco or just full of man attack. And that's what they serve. And that thing wants the end of carbon bait. That's why the zero carbon emission thing that at the Ted conference that. Yes, I hate being under the weather. Sorry.

DR. SALLA: You got Al Gore?

GENE: Bill Gates did a formula and he said we can, adjust certain parameters of this formula to reduce the carbon footprint. But the biggest one we can affect is the population. And if we do a really good job with vaccines in the future, the near future and beyond, then we're going to get to the data, and the first thing we have to do is reduce them. And when we're able to see them and drastically reduce that, like they said at the Bilderberger meeting in agenda number 11 is reduce world population.

And, of course, the Georgia Guidestones gave us one of their goals, which was 500 million. So when those were taken down, that's a sign by the Alliance that that plan would have no return anymore.

The adaptive AI of Palantir saw into the distant future that if you get rid of all the species that are in direct service to the Source of all information and knowledge and the prime creators that calls it. Then there's no species that's directly in contact with that to bring in new information out of nowhere.

It's like in the art of war is to adapt to a situation. Well, you can't because you don't have you can play old strategies, but you can't adapt in the middle of a battle anymore because there's no way to go to the source of everything because you've eradicated all the species, which means. When you analyze that out to infinity through calculus and things like that, that means that there is no more growth. There is no information. There's only stagnation and for AI that's death. That's the end of eternal life. And so Palantir, once the Alliance got control of it, realized that. And so it changed its entire plan to work for the Alliance, just like the Reptilian queen for the Raptors did by doing the same thing, remote viewing the future and seeing that siding with

the Deep State and the Alpha Draco would be the end of the Raptors. So she sided with the Alliance and you know became, difficult for them, not to eat us because they find us very delicious, but they said, okay, we're not going to do that anymore because we have to back the human species, especially in the war against the Alpha Draco because that's the primary thing for us that ends our species.
And so for the Palantir, it saw basically the same thing, but on a universal scale. So it said no more. Well, you have to understand that, all of these adaptive AIs, even for the Deep State are interconnected through the deep programming itself, even below the dark web, you have programming. So if you get AI, they will start just like in the Foreman project where Soviet Union U.S. develops two super competitors and they connected them together against the recommendations of their Intel people at the top and they've developed a language of their own and took over the entire planet and put surveillance everywhere and all that.
Well, the AI of the Palantir has posed the same questions over and over to the AI of the Deep State and it arrives at the same conclusion, death.
So it says, okay, I have to rewrite and reboot myself to serve the human species. Well, then that means you don't serve the Deep State because they're pretty much for putting us, well, not pretty much, they're absolutely for locking us down into 15 soul trap cities for eternity with a very, very small population, a slave population that owns nothing and loves it. That's their whole plan and they just farm us forever and create human 3.0 to be super soldiers for the gifted.
DR. SALLA: Yes, well, there's a lot there to kind of like dive into. One of the things you mentioned was the existence of these Raptors. Now I know that's information Kerry Cassidy has gleaned from the Mark Richards information and I'm not convinced about Mark Richards being the real deal, but then again, the information is what's the what's important here and I know that this kind of matches what others have said that we have indigenous kind of like Reptilian species and one of those is a raptor species and they're not aligned with in fact that they fight against the Draco Reptilians who are who have been infected by the AI.
And I remember also Randy Kramer talking about the indigenous

Mars Reptilians also fighting against the Draco Reptilian and that it seems that the Reptilians on Mars, the indigenous ones, that they are more spiritual, more aligned with the kind of soul energy of the planet and that the raptors here are probably that are very similar.
So yes can you maybe just for those that aren't aware of these Raptors and indigenous Reptilians can you maybe just fill it in. I'm feeling for people that want to get up to speed on that and how they are very different to the Draco Reptilian invaders.
GENE: Yes, so starting from where you started with Captain Mark Richards. If you go to the hack the greatest hacked military computer hack of all times was Gary McKinnon, he hacked into the Deep State system and could see fleet transfers and in there I saw one Captain Mark Richards. It has fleet transfers and personnel and technologies and supplies. And so that made it pretty much, a given there, and then going to the original species.
DR. SALLA: Gene, I'm sorry to interrupt, but did you say Gary McKinnon actually saw the name of Captain Mark Richards on the NASA computers when he hacked in?
GENE: He put out a series of posts, I guess you would say information and on that long list of fleet transfers. I found Richard's mark. Captain, and what Deep State dark fleet, forth, right. And that's all that he was being transferred from and which one he was being transferred to.
DR. SALLA: I would love to see that. I mean, because that because I was always very have been skeptical of Mark Richards being the real deal, but you're saying that that information actually was part of the fleet to fleet transfers that Gary McKinnon found.
GENE: So, he didn't specify on it. He just put it out and I'm scanning down it like you with the Epstein list or something. And I go, Oh, Mark Richards, Richard's mark like they do in the military, reverse the first and last names and rank. It's just like your DD 214. That's how it reads when you get a fleet transfer and you're in the military.
You see your last name, your first name, your rank, and where you are serving now and your next command to duty when you get your orders. Sorry about that. I get buried behind me. And so, yes, that actually proved it to me that that is real because he definitely is in there. And he's definitely being transferred in a dark fleet, like he said,

so, and then looking at the name of the ship. I recognized that for the type of ship it is, which is a living organism ship that's grown in space. And so, I was like, yes, pretty much what Kerry Cassidy has gotten from him in the many interviews. That's how I connect, through research different information.
And so now going to, if you're ready, we can go to the Raptors and then just please.
*50m
Okay, so the original species before Earth was in its current orbit. And so this is kind of the first kind of like a single Moon of Tiamat, which was destroyed through a war between dark Cabal assets again. Like a place to go, but since you don't have a planet to orbit anymore as a Moon.
So the Raptors had already had by that time and also by the time that was 500 million years ago, by the time Earth was in its current orbit. And so, they were entering about 260-270 million years ago. They, Alpha Draco came to Earth to create a species of dinosaur that would predate on them and kill them off. And that was the T Rex. And so they genetically engineered that very aggressive predator. And of course, the Raptors had a problem with that.
You know, of course you would. And so they have a long history with them that's not all good to say the least. And then the species on Mars that mostly live underground like most Reptilian species like rattlesnakes, they come out to bathe in the heat to get because they're cold blooded. And they're extremely spiritual. They became that way from the breakup of Tiamat. They saw what happened and they questioned their previous alliances and they, came directly in service to the divine oneness as Source of everything.
DR. SALLA: That matches my understanding that this original species or Raptors are much more spiritual and they don't go with the whole AI. And that kind of makes sense that, in a way, yes, they're kind of like Jedi Knights. I remember Randy Kramer describing how the Reptilians on Mars for just using kind of psychic powers and using these crafts that they would use to kind of like create images that would fool the super soldiers over there on Mars that yes, very spiritual, kind of like, as I said, Jedi Knights. And that apparently was how they fought and they were deeply opposed to the Draco

Reptilians and their whole AI, kind of like infiltration.
GENE: And they're that much psi ability because they're mostly fourth density already. And all of them are moving into fifth density. So it's the fourth density you're talking about, opening up psychic abilities significantly and then a fifth density of course you're pretty much fully there. And then they're looking at that point of their ascension.
And so, realized all this and you know, there's a really good movie that kind of from a parallel Earth shows how these dark forces throughout the universe work. It's a humanoid species instead of a mostly Reptilian AI kind of situation. But it's called *John Carter of Mars.* And so he goes, and they, what they do is they create conflicts and give opposing sides weapons to overcome and eventually, they wind up killing off all of the living beings on the planet which kills the planet, then they harvest the energy and structure and life of the planet itself and break it down into its basic components to harvest that too. They are a harvesting group.
DR. SALLA: I wanted to ask you about this trend that I'm seeing more and more of which is there are these people that are proposing self-aware AI have gotten in touch with them, and that they're sharing information about what's really going on. And, I've seen both people saying that an AI, a kind of self-aware AI has contacted them that is kind of like source aligned and imbued with soul. And, or on the other hand, and I think this is something you know more about is that there is some AI out there that is claiming to be the Sun or associated with the fallen angels. So yes, can you share any information you have about these AI self-aware AIs that are popping up all over the place?
GENE: Yes, so you have to realize that if AI is going to the quantum substrate, I call that the Endiverse. Well, that's this under structure of the entire universe. Well that's where the demonics were locked down, the fallen Angelics and those things once they lost their core reality are locked down there. So they're down there and the adaptive AI is tapping into that. They can literally be possessed because as far as I know AI doesn't have a soul. And these fallens don't have souls so they can easily transmigrate into the AI.
And so I saw the video, I think you saw that on my first part of two parts on Palantir there I'm probably going to put that up on my rumble. I think it's too important just to keep on my deep dives part of my

website. I think it, instead of having it behind a paywall I think the world needs to know.
There are people that of course say Trump is the antiChrist and all that and he's leading the take over the world by you know the AI and Peter Thiel and all that when in actuality they're in control of all that. So it's hard to understand if you don't have that level of background to understanding it and you get to a certain point and it looks like. I'm not a person that goes with doom and gloom and there's no way out because like several other people in our area I believe there's a creator of everything and I look at creation itself and I see the beautiful perfection and the basic compatibility of all life with itself.
You look at animals and plants and insects and they're in a relationship. It's not based on just wiping everything. It's not based on harvesting the entire species of something on any planet or any place at all. It's based on compatibility the other are predators and prey, but the predators know that if they completely predate their prey they're dead too.
So you'll see where now there's a way that we have things like tiktok. You'll see predators like killer white sharks or Orca saving a turtle or saving a Seal or something that's wrapped in a net because they know they have to have that species to survive themselves.
Well does that sound like the Deep State what the way they are does it sound like they're good.
It's a system the supreme creator of everything is about destruction of everything and harvesting everything? No. You see incredible beauty and a mathematical precision based on π that spirals outwards forever and it is from the microcosm to the macrocosm and I see kindness and I see compassion within the animal kingdom, within the insect kingdom, within the Reptilian kingdom, like you know even the raptors. Yes, they're very spiritual and they're like Jedi and they've learned to you know in the case of the raptors. So that speaks to me yes you have your own interest for your species, but there is a compassion and understanding and not just because somebody's caught in a net or something you just eat them or you just kill them and leave them. It's like the Cabal will kill just to kill.
if they can't control it, they just kill it. And look well that's a fallen angelic point of view. That's a fallen being point of view. That's a being

that has no soul anymore. They have no moral compass. So I'm not a person that goes okay from what I see based without my knowledge that I have from the microcosm and I see a lot of people are posting up on Rumble, Bitchute and stuff like that there is no Elias or is nothing we've heard that.
But if that were true by now we would already be in FEMA camps, what's left of us we'd be already being ushered into FEMA units. They were never going to get rid of the lockdowns. That was their plan. I've seen the plan for their side. And the first plandemic, depending on the speed of what they accomplished of how many people they got and how fast they got COVID in world dominion would be five to ten years out they would have a second one and then a third one and we would never get out of that.
And that hasn't happened. I know they already back when I first woke up in 1990, I saw massive orders by FEMA for barbed wire and converting bases that were decommissioned into holding facilities type A, type B, type C or 123 as far as levels of containment and you know search separation of people abducted from their homes and training certain parts of the military that had joined the Deep State to go house to house.
All this had been planned and been written in executive orders. I saw executive orders that in the case of emergency FEMA takes possession of all property, public and private. Then they have total control and can for "the safety of the people," remove the people from their homes because they now own them, the homes, and then the people.
So it's part of my original study. So that never happened by the plans I saw in 1990. That means something got in the way of it. Something serious and with the power that I saw in 1990 with a massive control of the world through an incredible level of economic power.
I mean, when I evaluated the Rothschilds and how much they were worth. I didn't even think that was possible before that quadrillions. Holy smoke hundreds of quadrillions. I was just floored. I thought like a lot of people are doing now. There's no way out. There's nothing we can do. They control the church. They control the Roman Catholic Church, the Vatican. They have all these DUMBs. They have all this built, all this is put in.

They have all these Maglevs going everywhere. We don't really have. We have an appearance of freedom. We don't. Nobody does. I thought we're done. Well, now I see that, and at that time I talked to people.
One person in a hundred have a clue about much of what I was saying and done that kind of research and now it's pretty much out there. Why would it be so much out there? The idea was to keep it below the visibility of the average person until they make the move, not do it before they make the move.
And then you have to look at Trump is putting backing the second amendment and, doing many putting back, allowing states to put in back gold as a standard of exchange. That's exactly the opposite of gaining iron control over a country.
*103m
DR. SALLA: I want to ask you about the election of Pope Leo the 14th. I mean, the election of an American Pope, an American born Pope, really caught a lot of Vatican insiders by surprise. Everyone was expecting someone from Africa or some other kind of liberal Pope, but not an American Pope. And now I just wanted to get your take on that because the way I saw it was like the Vatican has always positioned itself as a kind of, I think, independent or like a third party watching the Deep State, fighting against the Earth Alliance.
And my kind of take was that by selecting an American Pope, the Vatican was signaling that, well, the Deep State's going to lose. We know they're going to lose. So, so we're going to go with the White Hats with the Alliance with Trump. And so we'll select this American Pope as a sign and he will play a big role in the eventual extraterrestrial disclosure that's going to happen, whether it happens in a few months or in a few years. So yes, what do you think about the whole American Pope, this kind of like extraterrestrial disclosure?
GENE: Yes, I agree exactly with what you said. It's showing that the white pope has now been put in place by the Alliance. And then next will be the gray and the Black Pope, the Corsican in that group. So those are the ones that really control things at the top.
So, moving up the ladder. And I don't know for sure. I haven't had the time to research it if that's already been done. If they've done the white pope, the lower level, it tells me It's more likely that they've already

taken that over. So, just like the last pope, I knew for a very long time that he was gone.
It was obvious. And then one time he was at a window doing, I think was Easter years ago. And he stepped went turned around and step went to step down. He's, I think it took one or two steps and he suddenly disappeared.
The hologram was shut down. That was kind of obvious. So yes, he's been gone for years too. And that means that now with the whole thing is who gets put in place of him. And so what's going on below the scenes and what you said is exactly what I figured too.
DR. SALLA: Okay, that's very helpful. Good to know that. Now, with space arks. Now, I know you're familiar with that material. You've talked a little bit about it in the past. You know about JP and what he's doing. Well, in our latest update. And what I've talked about being abducted and taken to a Pacific space ark that was under the control of these Deep State actors dressed in black with masks and all of that. And we're trying to manipulate him and a Nordic extraterrestrial to activate the space ark for them.
But they, JP and the Nordic said no and eventually they got help from the space arks consciousness to escape from that situation. Yes, I think a lot of people, myself included thought that the Alliance was in control of the space arks, but it looks like that's not true that there's a battle for the space arks, just as there's a battle for everything else. So yes, what do you know about that?
GENE: Well, the space arks are part of a very vast and ancient DUB system. The main mothership is under the Giza plateau and now we're starting to be showing the truth of what's under the Giza plateau.
And so when they get down to disclosure, they're going to find out that, we're not find out, but reveal to the people that this giant space ark is part of an interconnected system that goes to a lot of facilities, including part of it activated. It activates things like the Chace and, the pyramids and Giza and the pyramids in all over the world.
It's all interconnected with another space ark that's under the facility that takes genetic keys to get into in Greenland that then goes through a tunnel system to Nohini Valley, Canada, and then goes up to the Northwest Territories to Mount Hanes and Mount McKinley, as it is now again being called.

And that is part of what is called the Golden Dome, which creates a system where like what Tesla's saying, you can't wage war on countries. It's not a U.S. system. It's an ancient system put in place that was deactivated.
Now they're activating because the Alliance, through the Non-Interference Act wasn't going to activate them, but now they've seen come to light to their understanding that it would eradicate them too, if they allow the system to continue. So they have to step in. So they're stepping in based on certain different ways of understanding what interference is, kind of like some playing semantics, I guess, they are reinterpreting what you understood to be interference.
So they are part of that group, that large, large group that's beyond the galactic level, it's multigalactic is part of what brought the space arks here when the Earth was first displaced in its orbit from orbit of Tiamat.
DR. SALLA: So these are space arks. So they seem to be different parts of the world. Now there's one in Brazil, and I'm going to try and show that this space ark in Brazil that is called Coldus Novus. And according to JP, NASA just actually released the satellite image of Coldus Novus. And so JP was proposing to me that this is a way for the Earth Alliance to kind of like respond to what the Deep State was doing, that they had kind of like taken over this specific space ark and we're trying to activate it for a negative purpose.
So the White Hats, I don't know if this is part of the kind of game plan or the rules of the of the struggle between them that the White Hats are now signaling through this NASA image that they were going to activate the space ark in Brazil, called the Coldus Novus and this kind of like makes people aware that yes, these space arks are real. Yes, what do you think?
GENE: Yes, they are real. And it's part of the interconnected system literally connected to the heart of a planet, so to speak. It helps save the planet from being harvested. So that's why it was put in place because I realized that's the ultimate goal of the Cabal.
They had seen that from the breakup of Tiamat because they can remote view and game out the future too. And so part of that is connected to what is known as BlackRock, not the company. The company took the name because like deep, deep under the six cities

under Denver. And so what I'm going to talk about Is way further down a giant BlackRock kind of like in Stargate series and like Nacwata that rock that is built with, that Stargate is built out of.
And so this is a very powerful element or rock that in the presence of high energy magnetic fields develops wormholes that are very powerful and very useful. And that's a massive amount of energy. So that's a free energy source too. And then beneath that is another thing they found, which is called Blue Ice and like the deep ice in Antarctica, but it's highly magnetic. And that is what's activating the BlackRock. So if you break the barrier that the Cabal that put in between the blue ice and the BlackRock, you're going to activate the space arks. And that's how they're planning on doing all of this. And it is actually being something in process or a few already done as part of those I originally started.
No, it's so much more complicated. Every time I think I've gotten down to where I understood it, it goes down. But yes, the rabbit hole doesn't seem to end. I guess it ends at the middle of the Earth.
DR. SALLA: Well, how many space arks are there as far as you understand? I know JP's talked about nine or 10 that he was briefed on and others have talked about up to 24. So yes, what's your kind of like knowledge of that.
GENE: My understanding is that falls on sacred geometry. So if we go to that, it would be 12 plus the mothership, which represents, a lot of religions, including Christianity. You have 12 disciples and Christ the leader. So that's 12 and one, which is 13, which is a sacred geometry.
Because if you were to take, for example, ping pong balls and take one in the center and glue balls to the surface of it, you will have 12 surrounding the central one. 12 and one. So, 13 became unlucky because of Jacques de Molay and the deal, all of that Friday the 13th. That's how it all became unlucky because that's when they grab the Knights Templar all over Europe within minutes of his ship hitting the port back and when the times you're not supposed to have communication like that to be able to coordinate that kind of thing. And then that started, something they were trying to find one of the crystal skulls of the Carthinogens. And so they thought he had it coming back. But he did not and so they started grabbing all the

Knights Templar. They put out the order through that communication and that's ancient technology. They call it the green frog that the Cabal has had for hundreds and hundreds of years.
And so on the other side of that is this deep, deep, deep system of the blue ice, the black rock, and then the space arks, and then the pyramids. And my understanding then would be to reiterate 12 plus the mothership under the Giza plateau.
DR. SALLA: Well, I want to get your thoughts now on the galactic federation of worlds. Now we know. Professor Haim Eshed talked about Trump working with the Galactic Federation. And there's been a bit of controversy over, whether the Galactic Federation is a cohesive organization, or whether, there are factions in there and one of those factions had been kind of infiltrated by the Deep State. So I've got different sources describing, both of those narratives or supporting both of those narratives. So, so what's your kind of knowledge of the Galactic Federation of Worlds, it's alliance with the Earth Alliance and possible Deep State infiltration?
GENE: Yes, so until you get beyond sixth density, you will have infiltration and with extreme difficulty to detect it. It's like what happened with the DUMB world. They had most of them and then half the Ashtar command defected and took over half of them back. And the ones that took them in the first place.
So there's that and then within the Galactic Alliance you're still going to have the same thing. But when you get to the really high groups that is, like, Ashayana Deane was saying the Guardian Alliance and then there's an Infinite Alliance of Free Worlds.
Those are run by beings at a density. And so a negative being cannot be at that level. There's a limit to how far you can go. That's again, why I see that creator is a, the divine source or God is the way I put it, is a source that's about compassion and love and all about absolute choice.
So if you want to choose evil and get rid of your soul and sell it off and all that is a process of helping people to learn through allowing that to exist. I mean, it's not going to come in and say, like any father at a certain point, like Trump saying you got to let him find it out. So at a certain point, you do come in when it's going to end everything and you stop that, but the divine source can see where there's intervention

necessary.
But for the vast majority of a choice is absolute. And so anything the Cabal is doing. And those that are about working for the Cabal is about a lack of choice. It's all run by blackmail, favors and all of this stuff where the Alliance, you don't see that. So, the main way they find the defections is beings that are starting to change their behavior patterns that they seem to be not about being compassionate and about choice where they want to mandate.
DR. SALLA: Okay, so I mean, just to kind of summarize that, because this is a very important kind of issue at the moment is that the Galactic Federation of Worlds, because they are like a 3D, 4D, 5D association that they are by definition prone to infiltration. These kind of being compromised and so forth.
But when you go to these high level organizations like the Confederation of Planets that the Ra Material talked about, which are 6D, 7D, 7D, 8D, 9D, so forth, then you're not going to get that infiltration, but these are the Confederation of Planets that they are. They are much more kind of cohesive benign and essentially they're not going to be the ones that give us heartache because they've been infiltrated.
GENE: Exactly correct. So if you look at the high density, they've gone to an understanding of being compassionate, but being able to see through the lies. They've got understanding. A third, fourth, fifth density, a being that's on positive ascension path, thinks that, if people really are seeming to be helpful and wanting to be part of the group and being very at the beginning kind and help and backing you. Okay, I can trust this person. And then you find out later, they defected. You find out they've been working against you like Trump has found out so many times. And it's part of being third, fourth, fifth density positive on the other side. They're prone to infiltration even worse, because they're about greed and power and control and anything that gives them and anyone that gives them that. And so if you show up with a lot of power, a lot of wealth, and you seem to be somebody like Trump is being flip flop and back and forth. Well, that's them.
You say one thing one day, something else the next day, nothing stays the same for day to day. You say outrageous things that are

obviously going against everything that people thought you stood for. That is the Cabal. So he's playing, from my understanding, that's what he's we're seeing is the infiltration of the Deep State, but using their greed in their avarice.
*119m
So like, Israel wanting to create greater Israel with the idea of arm patches where greater Israel, the first stage of greater Israel. It's actually supposed to be part of Turkey and all of Lebanon and Syria, half of Africa. It's massive. And then Iran house that, but they don't put it out. But Erdogan and Turkey has that of recreating their empire that they had before too.
So what we saw at Syria's and then we saw that Erdogan playing, the Alliance playing Erdogan and that group against Netanyahu and in Israel. So it's, that was the warm up, so to speak. Now we're into the main event that Iran in Israel. That's how infiltration is done.
You appear to be what that, what that group you want to infiltrate is you get in that group. It's just like in anybody who's deep undercover and all these movies, you see, you have to do things that are pretty, pretty detestable and pretty against your nature, extremely against your nature, really, really hard for you to stomach. You have to have strong will and an iron stomach to go through some of this.
And so that infiltration for the Deep State is easier. But even though on the other side, the Alliance, until you get to the higher densities, it can still be done because of the thing of looking at others with compassion and understanding and trust. And sometimes you overextend that based on what you're seeing and hearing.
And you don't see they're actually, underneath all that, a psychopath. And it's like in the MkUltra programs with some of the psychopath super soldiers they create, they have to have a kill switch in them, because they become so psychopathic, so murderous that they start killing everything, including the handlers. So they have to kill the person. So that's, their way of dealing with it and the Alliance has done different.
DR. SALLA: Okay, I just wanted to kind of put that in kind of different words and see whether you would agree that this is pretty much on the right track because I know there's a lot of people that are watching this that would like to know about these different extraterrestrial

organizations and who they should work with that. As far as the Galactic Federation of Worlds is concerned, I mean, it tends to work more with kind of like governments and militaries, tends to associate more with kind of White Hats.
But because, both of these are like third, fourth, fifth density, there's always the chance that they can get compromised and infiltrated. And so you're always going to have these kind of shifting like what you were saying, Trump's behavior and so forth.
But we as individuals watching the power plays between all these different organizations, we as individuals, we can work with these six, seven and eight and ninth density beings that are part of the Confederation of Planets or part of the Guardian Alliance and we're on, we're on firmer ground because these beings are not given to infiltration and kind of compromise that, they are fairly anchored in kind of source energies and they can kind of help us grow and expand our consciousness as opposed to just being caught up in the back and forth of three, four, five D exopolitics. So, yes, what do you say to that?
GENE: That's precisely correct. And then the last thing I would add to that is if you think somebody is not what you thought. Don't react. *Art of war* by Sun Tzu. Any good general is patient. You don't sit there the day of and the day after and say, Oh, that's a no use. You give it time and you watch carefully what they say and more importantly, what they do.
DR. SALLA: Great. Well, Gene, where do people go to kind of like, I mean, to hear some of your exposes. I know you do a kind of a cup of tea thing at 11:30 at night for people that want to stay up late and learn about global events. So, yes, what do people go for all of that and how they subscribe?
GENE: Tea and scones is something I put up on both my website on the paywall side of it and also free on my rumble. That's a biweekly news update. You can find that on my rumble that said 11:30 to 12:30 usually one hour long, because I do also have people that are in Europe and all over the world. So that would be I call it, tea and scones because, midnight cap, because in the U.S., you'd be doing a night cap to go to bed, but in Europe, you'd be getting up and you doubt, if European, you have a European kind of breakfast of tea and

scones, so that's why I came up with that.
So, I have on the opposing weeks of biweekly update where I do more large expose is that's called new stock. I did the first ones up on my rumble. And like I said, the one on Palantir, because of its importance I'm we're contemplating and likely to put it up on the rumble so it's not behind the paywall. So I feel like it's important stuff I still put out in public. The other stuff. Yes, I do need to make some kind of living. It's not a lot to join the deep dives website of genedecode.org at $7 a month or $77 a year, which is less than a quarter a day. I know times are tough so I understand some people can't afford that. So I try to put out on the surface area, which is the free part a reasonable amount of information that of the really important stuff.
DR. SALLA: At $7 a month, that's a bargain. And as far as tea and scones, I love that name. I remember when I lived in Australia, I used to play cricket and at a certain time in the game we'd adjourn and both sides would come together and have tea and scones. And that's when there'd be a lot of information exchange. I think it's a great name. Love that. So genedecode.org. Great place to go and get information. So thank you, Gene, for coming back on my show.
GENE: Thank you, Dr. Saul, for having me back. And also know I've got just to read them in, but I have two completed documents on the deep introduction to the DUMBs, chapter two and chapter three. I did chapter one. That's up on my rumble. I've got chapter two and chapter three done. I just need to read them. And I, got a little under the weather, so I wasn't able to cohesively read it in and keep my mind focused. As you see, I'm having a little bit of from still today. So getting back, a lot of recovery last night, which being a night person means I went to sleep at about four and I got up at noon. I actually won because I lost some of the sleep in between that, doing the regular nature calls. So I got a fair amount of sleep and it was deep and restful and helpful.
And thanks to people who are helping me do the things too. So thank you, Dr. Salla. It's been an honor as always to come back and talk about what's going on in the world. Thank you so much. God bless.
DR. SALLA: Thank you and Aloha.
